## GS1900-24HP

Smart Managed 24 port  
Gigabit Switch with PoE+

15% OFF

### High PoE budget

As energy costs increase businesses must try to avoid unnecessary energy waste. The GS1900-24HP supports 802.3at PoE+ standards providing up to 30 watts of power per port for advanced Powered Devices (PD) like 802.11ac wireless APs and video IP phones.

### Versatility and flexibility

ZyXel has the complete portfolio of 24-port compact desktop and rackmount switches with GbE connectivity. Enjoy high-speed business network applications effortlessly. The GS1900-24HP is equipped with 2 extra SFP slots to provide 100M and GbE speeds for long-distance deployments.

### Intelligent PoE design

ZyXel's Intelligent PoE provides two PoE supply modes: classification mode and consumption mode. This reserves the required power automatically. Set power feeding priorities on different ports to get the optimised use of power resource.

### ZyXel ONE Network experience

ZyXel ONE Network is designed to simplify configuration, management, and troubleshooting. ZyXel ONE Network redefines the network integration across multiple networking products from switch to wireless AP to Gateway.

## SMART MANAGED POE SWITCHES PERFECT FOR SMALL BUSINESSES

As connectivity demands from networking devices like IP phones, IP cameras and wireless Access Points increase, deployment complexity and costs rise.

Power over Ethernet (PoE) technology provides both data connection and electrical power to devices through just one cable.
